• **Tech Stack :** PHP, Laravel, Symfony, ReactJs, MySQL .

--- Projects

YardSignPlus | Geekybones (Link)   March 2022 - Present

- **Feature:** YardSignPlus.com website, specializing in custom yard signs. Designed an engaging platform with features like a user-friendly design and custom templates, seamless customizing and order, and a unique editor page for personalized template customization..
- **Tech**
  - **Frontend** : ReactJs, Redux, styled-components, Symfony, Symfony UX, HTML5, CSS, SCSS
  - **Backend** : Symfony
  - **Payment Gateways** : Paypal, Paypal Express, Braintree, Google Pay
  - **Deployment**: Leveraged Docker and nginx for seamless deployment, optimizing performance and reliability.
  - **Third Party Lib** :
    - Twilio SDK
    - Paypal Invoice Manager
    - Shipping Easy
- **Description:** YardSignPlus revolutionizes the way individuals create and personalize yard signs, offering a seamless and intuitive platform for expressing their unique messages and designs. As the driving force behind the project, I orchestrated the development of a feature-rich website that empowers users with unparalleled customization options. From the user-friendly design to the integration of cutting-edge technologies, every aspect of YardSignPlus is meticulously crafted to deliver a superior user experience. Whether it's for special occasions, events, or promotional purposes, YardSignPlus stands as the premier destination for creating eye-catching and impactful yard signs..

SportsGearSwag.com. | GeekyBones (link)

- **Feature:** SportsGearSwag.com website, specializing in custom printed cloths like shirt, tshirt, sports cloths with customizable editor. Designed an engaging platform with features like a user-friendly design and custom cloths, seamless customizing and order, and a unique editor page for personalized template customization..
- **Tech**
  - **Frontend** : Symfony, styled-components, react, HTML, CSS, SCSS
  - **Backend** : Symfony
  - **Payment Gateways** : Paypal, Paypal Express, Braintre

- **Description:** SportsGearSwag.com redefines the way sports enthusiasts express their passion through custom apparel, offering a seamless and personalized shopping experience. At the helm of this project, I spearheaded the creation of a cutting-edge platform that combines innovation with user-centric design principles. Our platform boasts an extensive selection of sports clothing, all of which can be easily customized to reflect individual styles and preferences. Whether it's for team uniforms, fan gear, or personal workouts, SportsGearSwag.com stands as the ultimate destination for high-quality, custom sports apparel. Join us in unleashing your creativity and showcasing your team spirit with our state-of-the-art editor and premium product offerings.

stealthmaskusa| GeeekyBones

- **Feature:** StealthMaskUSA website, specializing in designed printed mask, Gaiters Designed an engaging platform with features like a user-friendly design seamless order process.
- **Tech:** Laravel 6, HTML, CSS, JS, jQuery and some additional libraries.
Description: StealthMaskUSA website, specializing in designed printed mask, Gaiters Designed an engaging platform with features like a user-friendly design.

Personal Projects

NextStore| Personal Projects link

- **Feature:** Developed an engaging eCommerce platform specializing in products like gaiters, featuring a user-friendly design, seamless order process, and enhanced performance optimization..
- **Tech:** Next.js 14, Ant Design (AntD), Redux, Prisma, PostgreSQL, HTML, CSS, JavaScript, Styled Components, Vercel Analytics, and Vercel Tools..
- **Description:** Created a responsive, high-performance eCommerce platform with a focus on intuitive user experience. Leveraged Ant Design (AntD) for a sleek and polished UI, Redux for efficient state management, and PostgreSQL for scalable and secure data storage. The project also utilized Styled Components for enhanced styling flexibility and Vercel Analytics & Tools to monitor and optimize performance, ensuring a smooth shopping experience. Streamlined the order process to improve user interactions and transaction flow..
